

Milestone 1 Delivery

— Alfocuss

Project Deliverable Report (Updated)

Prepared: April 2026 • Version: 2.0 • Status: Complete

Overview

Following your direction, the site has been fully rebranded to **Alfocuss** — an AI-focused affiliate review site targeting academics. The niche, design, content, and architecture have all been updated to match your vision.

- **Brand:** Alfocuss
- **Niche:** AI publications, software, and applications
- **Audience:** Academics and researchers
- **Pages delivered:** 14
- **Build status:** Clean (zero errors)
- **Live preview:** [View the site](#)

1. Strategy & Sitemap

SITE MAP

/	Homepage
— /top-tools/	Top AI Tools (ranked product listing)
— /reviews/	Reviews Index
— /reviews/[product]/	Individual AI tool reviews
— /resources/	Resources Index
— /resources/[topic]/	Educational guides & tutorials
— /about/	About & Methodology
— /contact/	Contact & Suggest a Tool
— /disclosure/	Affiliate Disclosure (FTC)
— /privacy/	Privacy Policy
— /go/[product]/	Affiliate Link Redirects
— /404	Error Page (AI-themed)

CONTENT STRATEGY

The site follows a **hub & spoke model** organised around four AI tool categories:

- **Writing Tools** — AI assistants for drafting, editing, and academic prose
- **Research Assistants** — Tools for literature review, paper discovery, and evidence synthesis
- **Image Generation** — AI image generators for figures, diagrams, and presentation visuals
- **Coding Assistants** — AI coding tools for data analysis, scripting, and computational workflows

NAVIGATION

- **Primary nav (header):** Home, Top Tools, Reviews, Resources, About, Contact
- **Footer:** Newsletter signup, nav links, legal pages (Disclosure, Privacy)
- **Mobile:** Bottom navigation bar with quick-access icons

DATA ARCHITECTURE

All site content is driven by centralised data files:

- `site.json` — Brand name, tagline, colour palette, navigation
- `products.json` — AI tool metadata, pricing, scores, categories
- `affiliates.json` — Affiliate link destinations and network info
- `categories.json` — The four tool categories with descriptions

Why it matters: Changing any product, link, or brand detail means updating one file — the change propagates across the entire site automatically.

2. Design System

An ultra-modern dark theme designed for the AI/tech space.

TYPOGRAPHY

ROLE	FONT	USAGE
Headlines	Space Grotesk	Page titles, section headers — geometric, modern
Body text	IBM Plex Sans	Paragraphs, descriptions — technical, readable
Labels	IBM Plex Sans	Metadata, badges, navigation

All fonts are self-hosted (no third-party requests) for performance and privacy.

COLOUR PALETTE

COLOUR	HEX	USAGE
Base	#0F1115	Page background — dark graphite
Surface	#171A21	Cards, elevated sections
Primary (Cyan)	#0AADC F	Links, buttons, interactive elements
Accent (Amber)	#FFB347	Highlights, badges, secondary accents
Text	#F3F4F6	Primary body text — soft off-white
Muted	#A7AFBF	Secondary text, descriptions

DESIGN PRINCIPLES

- **Dark theme** throughout — premium, focused, distinctly modern
- **Frosted glass panels** — dark translucent overlays for cards and sections
- **Grain texture** — subtle noise overlay for tactile depth
- **Hover glow effects** — cyan and amber glows on interactive elements
- **Animated score counters** — scores animate into view on scroll
- **Scroll-triggered reveals** — content fades in as you scroll

Why it matters: Design is a trust signal. The ultra-modern dark theme positions Alfocus as a premium authority in the AI tools space — not another generic affiliate template.

3. Homepage

SECTIONS BUILT

#	SECTION	DESCRIPTION
1	Hero	Bold typographic-only hero. Animated typewriter cycles through "Research", "Writing", "Analysis", "Discovery"
2	Value Grid	Asymmetric bento layout — "50+ AI Tools Tested" hero tile, plus In-Depth Reviews, 4 Categories, and 3-D Scoring
3	Category Browser	Four-card grid: Writing Tools, Research Assistants, Image Generation, Coding Assistants
4	Methodology	Four numbered steps: Feature Analysis → Workflow Integration Testing → Academic Use Case Scoring → Value Assessment
5	Split CTA	Primary button to /top-tools/ plus secondary newsletter signup

Fully responsive across mobile, tablet, and desktop.

4. Core Pages

PAGE	PURPOSE
About	Mission statement, AI evaluation methodology, academic positioning
Contact	"Suggest a Tool" form + direct email link
Affiliate Disclosure	FTC-compliant disclosure with SaaS-appropriate language
Privacy Policy	Standard privacy policy
404 Error	AI-themed personality ("This Page Hallucinated Itself Out of Existence")

All pages written with the Alfocuss brand voice — authoritative, direct, slightly informal.

5. Content Framework

TOP TOOLS (/TOP-TOOLS/)

The primary conversion page. Displays all AI tools organised by category with product cards, multi-dimensional score bars, a master comparison table, and real company logos.

REVIEWS (/REVIEWS/)

- **Index page** — Grid layout showing all reviewed tools
- **Individual reviews** — 5-section template: TL;DR → Deep Dive → Pricing → Who It's For → Final Verdict
- **Demo reviews:** ChatGPT Plus, Claude Pro, Consensus AI

RESOURCES (/RESOURCES/)

- **Index page** — List of educational guides
- **Individual resources** — Template: Introduction → Step-by-step → Tool Recommendations → Key Takeaways
- **Demo resource:** "Getting Started with AI for Research"

CONTENT COLLECTIONS (MDX)

Reviews and resources use Astro Content Collections with structured schemas. Adding new content in Milestone 2 means creating a single .mdx file with frontmatter — no code changes needed.

Why it matters: These templates define the content system. When real content is added in Milestone 2, it slots into these proven layouts. The demo pages demonstrate exactly how the final site will look and function.

6. Scoring System

A transparent, multi-dimensional scoring system designed for academic decision-making.

DIMENSION	WHAT IT MEASURES
Ease of Use	Learning curve, UX quality, onboarding experience
Academic Value	Fit for scholarly research, writing, and workflows
Price-to-Value	Cost-effectiveness relative to alternatives
Overall	Simple average of the three dimensions (out of 10)

7. Placeholder Products

Seven representative AI tools with real company logos, placeholder affiliate links, and sample scores:

PRODUCT	CATEGORY	PRICE	OVERALL
ChatGPT Plus (OpenAI)	Writing, Research	\$20/mo	8.0
Claude Pro (Anthropic)	Writing, Research, Coding	\$20/mo	8.7
Consensus	Research	\$9.99/mo	8.7
Elicit (Ought)	Research, Writing	\$10/mo	9.0
Midjourney	Image Generation	\$10/mo	6.7
GitHub Copilot	Coding	\$10/mo	8.7
Grammarly AI	Writing	\$12/mo	8.0

Affiliate links currently point to each product's official site. These will be updated with your real affiliate account links in Milestone 2.

8. SEO Foundation

FEATURE	STATUS
Unique title & meta description per page	☐ Done
Open Graph tags (social sharing)	☐ Done
Twitter Card tags	☐ Done
Canonical URLs	☐ Done
JSON-LD schema markup	☐ Done
XML Sitemap (auto-generated)	☐ Done
Semantic HTML	☐ Done
Static site generation (pre-rendered)	☐ Done
Self-hosted fonts (no third-party CDN)	☐ Done
Branded favicon (AI lettermark)	☐ Done
OG sharing image	☐ Done

What's Next — Milestone 2

DELIVERABLE	DESCRIPTION
Content	Full reviews, resources, and roundup content for all products
On-page SEO	Keyword research, title tag tuning, internal linking
Performance	Speed and mobile optimisation (Lighthouse 90+ target)
Affiliate links	Real affiliate link setup with your account credentials
Newsletter	Backend integration for email signup
Testing	Cross-browser and mobile device testing
Revisions	Client review and revisions (up to 2 rounds)
Launch	Production deployment and launch support
