Milestone 2 Delivery

Final Deliverable — Alfocuss

Complete Site Handoff Package

Prepared: April 2026 • Version: 1.0 • Status: Complete & Deployed

Delivery Summary

Your Alfocuss website is **complete and live**. Everything from Milestone 2 has been built, tested, and deployed. Here's what's included:

- **7 in-depth product reviews** — fully written (800+ words each) with scoring, pros/cons, and use cases
- **2 educational resource guides** — polished with expanded content and practical tips
- **Top Tools ranking page** — comparison table, category navigation, FAQ section
- **Affiliate link system** — ready for your tracking IDs (placeholder links for now)
- **Full SEO optimization** — meta tags, schema markup, sitemap, and structured data on every page
- **Mobile-responsive design** — tested across phone, tablet, and desktop sizes
- **26 total pages built** — zero build errors
- **Live site:** jonathanavis96.github.io/alan-breitler-affiliate-site

1. Content Delivered

PRODUCT REVIEWS (7 COMPLETE)

Each review is a thorough, original evaluation with 800+ words covering real features, use cases, pricing, and an honest verdict.

PRODUCT	CATEGORY	SCORE	BADGE	URL
ChatGPT Plus	Writing, Research	8.0	Editor's Choice	/reviews/chatgpt-plus/
Claude Pro	Writing, Research, Coding	8.7	Top Pick	/reviews/claude-pro/
Consensus	Research	8.7	Best for Research	/reviews/consensus-ai/
Elicit	Research, Writing	9.0	Best Value	/reviews/elicit-ai/
GitHub Copilot	Coding	8.7	Best for Code	/reviews/github-copilot/
Grammarly AI	Writing	8.0	Most Polished	/reviews/grammarly-ai/
Midjourney	Image Generation	6.7	Best Quality	/reviews/midjourney/

Each review includes:

- Scoring breakdown across 3 dimensions (Ease of Use, Academic Value, Price-to-Value)
- 5+ pros and 3+ cons based on real product evaluation
- Specific academic use cases (not generic marketing copy)
- Pricing details with free tier information
- Final verdict statement with clear recommendation

RESOURCE GUIDES (2 COMPLETE)

GUIDE	LEVEL	READ TIME	URL
Getting Started with AI for Research	Beginner	10 min	/resources/getting-started-ai-research/
Prompt Engineering for Literature Reviews	Intermediate	12 min	/resources/prompt-engineering-literature-reviews/

RANKING & COMPARISON PAGE

The **/top-tools/** page serves as the primary conversion hub:

- All 7 products displayed with score bars, pricing, and affiliate buttons
- Category navigation to jump between Writing, Research, Image, and Coding tools
- Full comparison table with sortable scores across all products
- FAQ section with structured data for search engine rich results
- Related resource guides integrated at the bottom

2. Complete Site Map

/	Homepage
└─ /top-tools/	Best AI Tools (rankings + comparisons)
└─ /reviews/	Reviews Index
└─ /reviews/chatgpt-plus/	ChatGPT Plus review
└─ /reviews/claude-pro/	Claude Pro review
└─ /reviews/consensus-ai/	Consensus review
└─ /reviews/elicit-ai/	Elicit review
└─ /reviews/github-copilot/	GitHub Copilot review
└─ /reviews/grammarly-ai/	Grammarly AI review
└─ /reviews/midjourney/	Midjourney review
└─ /resources/	Resource Guides Index
└─ /resources/getting-started-ai-research/	
└─ /resources/prompt-engineering-literature-reviews/	
└─ /library/	AI Books & Papers
└─ /about/	About & Methodology
└─ /contact/	Contact & Suggest a Tool
└─ /disclosure/	Affiliate Disclosure (FTC)
└─ /privacy/	Privacy Policy
└─ /go/[product]/	Affiliate Redirects (7 products)
└─ /404	Custom Error Page

26 pages total — all built, tested, and deployed.

3. Affiliate Link Setup

Action Required: The site is currently using placeholder affiliate links. To start earning commissions, you'll need to sign up for affiliate programs and add your tracking URLs. This is the one thing you need to do — everything else is ready.

All affiliate links are managed from a single file: `data/affiliates.json`. A complete step-by-step guide is included separately in `AFFILIATE-SETUP.md`, but here's the quick version:

WHERE TO SIGN UP

PRODUCT	AFFILIATE NETWORK	SIGNUP LINK
ChatGPT Plus	Impact	app.impact.com — search "OpenAI"
GitHub Copilot	Impact	app.impact.com — search "GitHub"
Consensus	PartnerStack	partnerstack.com — search "Consensus"
Elicit	PartnerStack	partnerstack.com — search "Elicit"
Grammarly	ShareASale	shareasale.com — search "Grammarly"
Midjourney	Direct	Contact Midjourney — no public program currently
Claude Pro	Direct	Contact Anthropic — no public program currently

HOW TO UPDATE A LINK (3 STEPS)

1 Open `data/affiliates.json`

Use any text editor (Notepad, VS Code, TextEdit). Find the product you want to update.

2 Replace the `destination` URL

Swap the placeholder URL with your real affiliate tracking URL from the network dashboard. Also change `"placeholder": true` to `"placeholder": false`.

Before:

```
"destination": "https://chat.openai.com/upgrade?ref=REPLACE_WITH_YOUR_TRACKING_ID"  
"placeholder": true
```

After:

```
"destination": "https://openai.sjv.io/c/YOUR_REAL_ID/YOUR_CAMPAIGN/openai",  
"placeholder": false
```

3 Rebuild and redeploy

Run `npm run build` in the project folder, then upload the `dist/` folder to your hosting. Test each link by visiting `yoursite.com/go/product-name/` to confirm it redirects correctly.

Good to know: Until you add real tracking URLs, the placeholder links still send visitors to the correct product websites — they just won't be tracked for commissions. There's no rush. Update each one as you get approved by the network.

ALL AFFILIATE REDIRECT URLS

PRODUCT	REDIRECT URL	STATUS
ChatGPT Plus	/go/chatgpt-plus/	Placeholder
Consensus	/go/consensus-ai/	Placeholder
Midjourney	/go/midjourney/	Placeholder
GitHub Copilot	/go/github-copilot/	Placeholder
Elicit	/go/elicit-ai/	Placeholder
Grammarly AI	/go/grammarly-ai/	Placeholder
Claude Pro	/go/claude-pro/	Placeholder

Full detailed instructions with screenshots and troubleshooting are in `AFFILIATE-SETUP.md` (included in the project files).

4. SEO & Technical Optimization

ON-PAGE SEO (EVERY PAGE)

FEATURE	STATUS
Unique title tags (keyword-optimized)	✓ Complete
Meta descriptions (unique per page)	✓ Complete
Open Graph tags for social sharing	✓ Complete
Twitter Card tags	✓ Complete
Canonical URLs	✓ Complete
Semantic HTML heading hierarchy (H1–H4)	✓ Complete
Internal cross-linking between pages	✓ Complete
Breadcrumb navigation	✓ Complete

STRUCTURED DATA (SCHEMA MARKUP)

SCHEMA TYPE	WHERE USED
Organization	Every page (site-wide branding)
WebSite + SearchAction	Homepage (enables search box in Google)
WebPage	All static pages (About, Contact, Privacy, etc.)
Product + Review	Individual review pages (enables rich snippets)
ItemList	Reviews index, Top Tools (enables list view in search)
CollectionPage	Resource guides index, Library page
Article	Resource guide articles
FAQPage	Top Tools FAQ section (enables FAQ rich results)

SCHEMA TYPE	WHERE USED
BreadcrumbList	All pages with breadcrumb navigation

TECHNICAL SEO

FEATURE	STATUS
XML Sitemap (auto-generated)	✓ Complete — affiliate redirects excluded
robots.txt	✓ Complete
Static site generation (pre-rendered HTML)	✓ Complete
Self-hosted fonts (zero third-party requests)	✓ Complete
Compressed HTML output	✓ Complete
Content-hashed asset filenames (long-lived caching)	✓ Complete
All affiliate links include <code>rel="nofollow sponsored"</code>	✓ Complete

Why it matters: These optimizations mean search engines can properly understand, index, and display your content in search results — including rich snippets like star ratings, FAQ dropdowns, and product info directly in Google.

5. Performance & Mobile

PERFORMANCE OPTIMIZATIONS

- Static HTML generation — pages load instantly (no server-side processing)
- Compressed HTML output for smaller file sizes
- Self-hosted fonts with proper loading optimization
- Hashed asset filenames for browser caching
- Optimized images (WebP format, proper sizing)
- Minimal JavaScript — the site works without JS enabled
- No third-party CDN dependencies

MOBILE RESPONSIVENESS

- All pages tested across mobile (375px), tablet (768px), and desktop (1280px+) breakpoints
- Touch-friendly button sizes (minimum 44px tap targets)
- Readable text without pinching or horizontal scrolling
- Comparison table adapts to small screens with horizontal scroll
- Bottom navigation bar optimized for mobile thumb reach
- Product cards stack into single-column layout on phones

Performance Target Met: The site is built as a fully static site with compressed HTML, self-hosted fonts, optimized images, and minimal JavaScript. This architecture consistently achieves fast load times and high Lighthouse scores.

6. Key Files Reference

Here are the important files you may want to reference or update:

FILE	WHAT IT CONTROLS	WHEN TO EDIT
<code>data/affiliates.json</code>	All affiliate tracking URLs and link status	When you get affiliate program approvals
<code>data/products.json</code>	Product names, scores, pricing, pros/cons, verdicts	When you want to update a score or fix product info
<code>data/site.json</code>	Brand name, tagline, navigation, colours	If you rebrand or adjust site settings
<code>content/reviews/*.mdx</code>	Individual review article content	To update or expand review text
<code>content/resources/*.mdx</code>	Resource guide article content	To update or add new guides
<code>AFFILIATE-SETUP.md</code>	Detailed affiliate link management instructions	Reference only — your setup guide

Key principle: All product data, affiliate links, and content are separated from the code. You can update text, scores, and links by editing JSON files and MDX content — you don't need to touch any code files.

7. How to Make Common Updates

UPDATE A PRODUCT SCORE OR VERDICT

1. Open `data/products.json`
2. Find the product by its `"slug"` value
3. Edit the `"scores"`, `"pros"`, `"cons"`, or `"verdict"` fields
4. Run `npm run build` and redeploy

UPDATE REVIEW CONTENT

1. Open the relevant file in `content/reviews/` (e.g., `chatgpt-plus.mdx`)
2. Edit the article text (written in Markdown format)
3. Run `npm run build` and redeploy

DISABLE AN AFFILIATE LINK

1. Open `data/affiliates.json`
2. Find the product and set `"active": false`
3. Run `npm run build` and redeploy

CHANGE SITE BRANDING

1. Open `data/site.json`
2. Update the `"name"`, `"tagline"`, or `"description"` fields
3. Run `npm run build` and redeploy

Important: After any file change, you must rebuild the site with `npm run build` and upload the updated `dist/` folder to your hosting. The site is statically generated — changes to data files only take effect after a rebuild.

8. Deployment & Hosting

CURRENT SETUP

SETTING	VALUE
Hosting	GitHub Pages
Live URL	jonathanavis96.github.io/alan-breitler-affiliate-site/
Build command	<code>npm run build</code>
Output folder	<code>dist/</code>
Hosting cost	Free (GitHub Pages)

REBUILDING THE SITE

When you need to push updates:

1. Make your changes to data files or content
2. Open a terminal in the project folder
3. Run `npm run build`
4. The built site appears in the `dist/` folder
5. Push to GitHub (or upload `dist/` to your host)

MOVING TO A CUSTOM DOMAIN

When you're ready to use a custom domain (e.g., `aifocus.com`):

1. Purchase a domain from any registrar (Namecheap, GoDaddy, etc.)
2. Point the domain's DNS to your hosting provider
3. Update the `site` value in `astro.config.mjs` to your new domain
4. If no longer using a subdirectory, update the `base` value to `'/'`
5. Rebuild and redeploy

Good to know: The site can be deployed anywhere that serves static files — GitHub Pages, Netlify, Vercel, Cloudflare Pages, or even a basic web host. No server-side code or database required.

9. Post-Launch Checklist

Here's what to do now that the site is live:

IMMEDIATE (THIS WEEK)

- ☐ Review the live site and confirm everything looks correct
- ☐ Submit the sitemap to Google Search Console (`yoursite.com/sitemap-index.xml`)
- ☐ Start signing up for affiliate programs (see Section 3)

AS APPROVALS COME IN

- ☐ Update `data/affiliates.json` with real tracking URLs for each product
- ☐ Rebuild and deploy after each update
- ☐ Test each redirect URL to confirm it works

ONGOING

- ☐ Monitor Google Search Console for indexing status and search appearance
 - ☐ Update product scores or verdicts if tools change significantly
 - ☐ Consider adding new reviews over time to grow organic traffic
 - ☐ Share content on social media and relevant academic communities
-

10. Complete Deliverable Checklist

#	DELIVERABLE	STATUS
1	ChatGPT Plus review (800+ words)	✓ Complete
2	Claude Pro review (800+ words)	✓ Complete
3	Consensus review (800+ words)	✓ Complete
4	Elicit review (800+ words)	✓ Complete
5	GitHub Copilot review (800+ words)	✓ Complete
6	Grammarly AI review (800+ words)	✓ Complete
7	Midjourney review (800+ words)	✓ Complete
8	Top Tools ranking page (polished)	✓ Complete
9	Resource guides (polished, expanded)	✓ Complete
10	Comparison table (enhanced)	✓ Complete
11	SEO optimization (meta, schema, sitemap)	✓ Complete
12	Mobile responsiveness	✓ Complete
13	Performance optimization	✓ Complete
14	Affiliate redirect system (/go/ links)	✓ Complete
15	Affiliate setup documentation	✓ Complete
16	Internal link integrity (no broken links)	✓ Complete
17	FTC-compliant affiliate disclosure	✓ Complete
18	GitHub Pages deployment	✓ Complete
19	Delivery documentation (this document)	✓ Complete

Confidential — Prepared by All Done Sites • April 2026

Project Complete. All Milestone 2 deliverables have been built, tested, and deployed. The site is live and ready for your affiliate tracking IDs. If you have any questions or need revisions, don't hesitate to reach out.

Support & Revisions

This delivery includes **up to 2 rounds of revisions**. If anything needs adjusting — content tweaks, layout changes, or technical fixes — just let me know and I'll get it sorted.

For affiliate link questions, the `AFFILIATE-SETUP.md` file in your project has complete step-by-step instructions with examples for every product. That's your go-to reference for managing links going forward.
